🖋 Professional Summary

I am a motivated BS **Computer Science** student with strong technical foundations in software development and **web technologies**, including **PHP, HTML, CSS, Bootstrap, and JavaScript**. My academic journey has strengthened my **analytical thinking, research aptitude, and problem-solving capabilities**, enabling me to approach complex computational challenges systematically.

I am particularly interested in advancing my knowledge through research-driven environments where **innovation, collaboration**, and interdisciplinary learning are encouraged. With the ability to work effectively both independently and within multicultural and multidisciplinary teams, I aim to contribute to impactful research initiatives while continuously enhancing my technical and academic competencies.

👛 Professional Experience

12/2024 – 06/2025
Chakdara, Pakistan

Codecrushtechnologies 🔗

Web developer

- Developed dynamic websites using **PHP, HTML&CSS, JavaScript, Bootstrap**.
- Converted design mockups into fully functional, **responsive web applications**.
- Implemented both **front-end** interfaces and **back-end** functionality.
- Enhanced **website performance** and cross-platform **compatibility**.
- **Collaborated** with team members to achieve project goals and deadlines.

📁 Projects

07/2025 – 06/2026

Digital Time Tracker System, *(PHP-Based Web Application)*

Developed a web-based Digital Time Tracker System using PHP and MySQL as my **Final Year Project (FYP)** for the **Bachelor of Science in Computer Science (BSCS)** program. The system was designed to help software houses and organizations manage projects, track employee working hours, monitor task progress, and generate productivity reports. The application features a **Super Admin Panel, Admin Panel, and User Panel** with role-based access control to ensure secure and efficient management of system operations. The **Super Admin** manages administrators, users, projects, and system settings. The **Admin** oversees projects, assigns tasks, monitors employee activities, and generates reports. The **User** can log work hours, update task progress, and view assigned projects through a personalized dashboard.

The system includes user authentication, project management, task assignment, time tracking, dashboard analytics, and reporting modules, helping organizations improve productivity, workflow efficiency, and project monitoring.

04/2025 – 05/2025

Personal_blog_System

PHP-based web application for creating and managing blog posts, categories, and content with an admin panel for full control, and MySQL database integration.

02/2025 – 03/2025

hospital-management-system, *PHP-based web application*

for managing patient records, appointment scheduling, doctor details, and MySQL database integration.

01/2025 – 02/2025	Expense Management System , <i>PHP-based web application</i> for tracking daily expenses with category-wise reporting, data visualization, and MySQL database integration.
12/2024 – 01/2025	Grocery_listing PHP-based web application for managing grocery items, adding items, checking completed items, creating lists, tracking quantities, and MySQL database integration.

Skills

• HTML & CSS	• PHP	• PHP framework (Laravel)
• (RDBMS) MySQL	• Javascript	• Bootstrap
• Front-end Developer	• Back-end Developer	• MS office (word, excel, powerpoint)

Education

11/2022 – 06/2026 Chakdara , Pakistan	BS Computer Science , <i>University of Malakand</i>  University of Malakand Graduation: Batch of 2022–2026 CGPA: 3.1/4
09/2021 – 09/2022 Timergara Dir lower	Diploma in Information Technology (DIT) , <i>Khyber Pakhtunkhwa Board of Technical & Commerce Education, Peshawar Government Polytechnic Institute Timergara</i> 2022 • Successfully completed Diploma in Information Technology (DIT). • Achieved 1120/1400 marks (Grade A+). • Developed foundational knowledge in computer systems, programming, databases, networking, and office applications.

Languages

Urdu	English Duolingo English score 95
